Shipping Terminal Operating System

Navis LLC, the global leader in supply chain execution software for cargo logistics, has developed its new generation SPARCS N4 Terminal Operating System (TOS) with UltraLightClient. Servicing more than 170 deep-sea ports in 50 countries, SPARCS N4 is a cornerstone of world-wide shipping logistics. Delivering a rich user experience over the Internet is a key improvement for SPARCS N4 customers that will enhance their productivity substantially, as they continue on their road towards improved B2B process management and business execution.

The first successful implementation of the new, UltraLightClient-based version of SPARCS N4, has gone live at Lyttelton Port of Christchurch in April 2006, marking the beginning of a new era in shipping logistics.

The screenshot displays the SPARCS N4 software interface. The main window shows a list of units with columns for Unit Nbr, Type, Line, Category, Position, I/B Actual Visit, and Fright Kind. A 'Vessel Inspector for CPB014A' window is open, showing details for the vessel 'CAP BRETT vuyg 511NB'. The vessel details include Visit (CPB014A), Service (NEAS), Line (HSD), I/B Vuyg (510SB), and O/B Vuyg (511NB). The status is 'Working' at the 'LCT' facility, with an ETA of '04 Apr 08:03' and an ETD of '04 Apr 23:00'. Below the vessel details is a table of lines with columns for Unit Nbr, State, Type, Category, Line, Stop, Position, and Fright Kind.

Requirements

- Rich GUI for professional users
- Easy deployment and upgrade
- Server-side J2EE web architecture
- Scalable industrial strength product

Key Benefits

- Enables SPARCS N4 customers to provide sophisticated B2B processes over the Internet
- High user productivity
- Robust mission-critical Rich Internet Application (RIA)
